

GOALOS MISSION OS

Set the objective. GoalOS runs until proof is done.

The Proof OS for autonomous AI work.

AI creates output. GoalOS creates proof.

No proof, no settlement. No rollback, no release.

Governed Decision State

Evidence Docket • Verifier Report • Risk Ledger • Action Graph • Chronicle

The moat is the evidence graph.

A living record of missions, proofs, reviews, decisions, and reusable capability.

From topic to mission.

From report to proof.

From insight to action.
